Progressing from Visual to Automatic Color Measurement

### Dual Ability to View Color Measurement

On-screen color  
On-screen numerical display

### Easy Transition from Visual to Electronic Measurements

Some color graders who are used to the traditional comparator series sometimes find the upgrade to an electronic system daunting. The assurance of relying on physical color difference is diminished. This transition has now been made easy.

### Touch Screen Technology

Enables you to easily programme the instruments with instinctive menus on screen.

### Programmable Settings

You can set language\*, date and time, view preferences and create projects with individual tolerance settings.

### On-Screen Warning System

You can react immediately to results that might be out of tolerance with immediate information on the sample.

Within tolerance = green

Outside tolerance = red

On border of tolerance = amber

### User Friendly Ergonomics and Intuitive Interface

You are guaranteed to be up and running quickly and easily supported.

- 3 Field Comparator View & Numeric Results
- Visual Representation Aligned to the Comparator 3000
- Validation Liquid and Glass Standard Included
- Immediate and Accurate, Straight from the Box

Part Number: 163020

### Easy storage and sharing of results

Large data storage (> 20,000 readings) and USB connectivity ensure your results can be stored and easily shared.

### Single Scale Measurement

The EC 3000 Saybolt provides you an individual scale to measure Saybolt Color (ASTM D 156, ASTM D6045).

\* Supported languages: English, French, German, Spanish, Italian, Chinese, Japanese, Russian.

## Industry

Oil and Gas

## Application

Petroleum Oils and Waxes

## EC 3000 Saybolt

The EComparator series advances color measurement, enabling you to progress from Visual (subjective) to Electronic (objective) results. With the EComparator series, you can now view the color difference with on-screen color and on-screen numerical display.
